JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# SANFORD'S VERNIER CHRONOSCOPE II

No. 20137  
\$38.00 Net

If you want an inexpensive, simple chronoscope, that permits work of an acceptable degree of accuracy, and, an instrument with which all the usual reaction experiments may be readily performed, we recommend for your earnest consideration this Model II. In the event that you have never worked with this instrument there is a pleasant surprise in store for you.

Model II is meeting the requirements of the psychological laboratories in many parts of the world, and, so if your appropriation is not large enough to permit the purchase of one of the more expensive chronoscopes, you

nevertheless, need not despair, for you are still able to perform with a fair degree of accuracy the usual reaction experiments at a comparatively small cost. The Sanford Vernier Chronoscope II is a very satisfactory instrument for students' use.

A pamphlet giving details both on the construction and use of the instrument is yours for the asking. This pamphlet also describes Model I which is of simpler construction and possesses a smaller field of usefulness.
